

Data Sheets

_ [1]

Data Sheets are short documents that provide the most up-to-date demographic information about the Puerto Rican population in the United States. Data provided by the U.S. Census Bureau is summarized through a series of charts, tables and maps to illustrate major points and changes within the Puerto Rican population. These data sheets are recurrent projects that are released by our Data Center in response to the release of data by the U.S. Census Bureau.
